Do you have
DATA or
INSIGHTS?

Challenges with Traditional Analytics

You only get what you ask for

Complex and Expensive

Requires significant technical expertise, extensive data prep and business users to iterate with technical team.

Rigid and Slow to Evolve

Must pre-identify the metrics and insights. New insights require new setup – could take weeks or months to set up.

Dependence on IT

Requires significant IT & developer engagement for data modeling, report generation, and distribution.

Limited Insights

Focused on pre-defined reports and dashboards. You only get what you ask for.

How Can Brands Maximize Value from Their Data?

Harness engagement data from across the organization to drive real-time insight that improves CX and reduces cost

Open Data

Leverage an open data approach that is free to ingest and export data from anywhere in the enterprise

Enriched By Business Workflows

Capture and enrich engagement data through all the business processes that touch it

Powers Users in Your Ecosystem

A unified source of engagement data designed to power all consumers in the ecosystem

Engagement Data Maximizes CX Automation Impact

Engagement data is unique, resides in corporate silos, and hard to harness

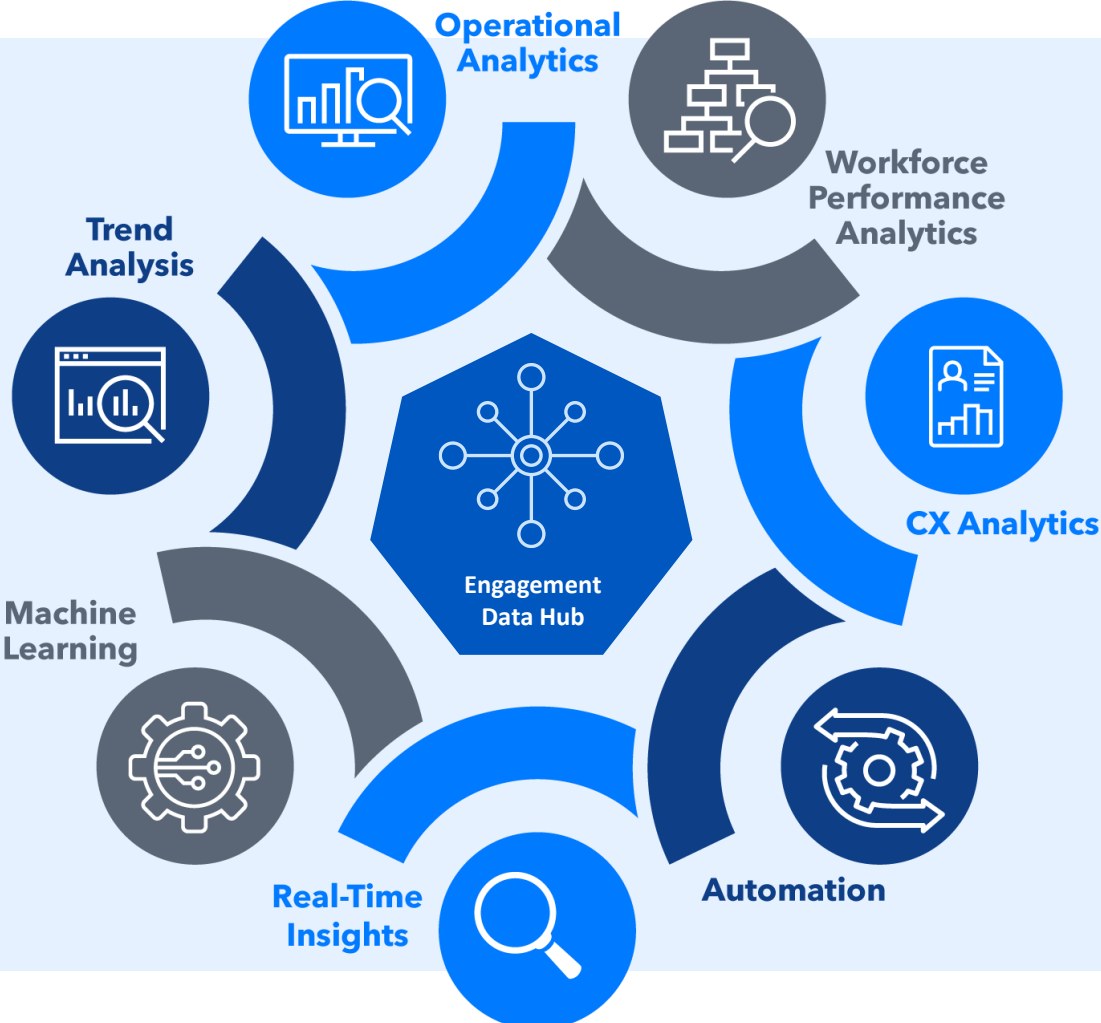

What is Engagement Data?

- **Omnichannel interaction data**
(all channels and all modalities)
- **Customer and employee experience data**
(any type of survey)
- **Workforce performance data**
(Workforce across the Enterprise)

Engagement Data Maximizes CX Automation Impact

Engagement data is unique, resides in corporate silos, and hard to harness

Unlocking the Power of Data

Making data easily accessible to everyone on their own terms

Business Users and Executives

Self-service access to data insights

DATA ACCESS

Specialized Bots

Open Data Hub enriched with partner data

Data Analysts

Data Catalog integrates with Enterprise BI

Data Scientists

Easy API integration with Data Lakes

Data Hub Makes Engagement Data Accessible

Eliminate numerous data silos and create a unified data hub

Key Takeaways

- Data does not automatically equal insights
- A unified, open data hub is essential to...
 - Eliminating data silos
 - Enriching engagement data through all the business processes that touch it
 - Making data easily consumable across all types of data users
- Unlocking the power of your data is complex.

Thank You!
