Growing Customer Expectations

Customer expectations continue to increase as they continue to be empowered by new technologies.

Managing & Delivering Content

Factors Affecting Content & Knowledge Management – EMEA and Americas

Knowledge Management is Key

- Eliminate departmental & information silos
- Manage all content from one platform
- Easily identify gaps in information
- Create customer-specific conversations for virtual & live agents
- Deliver consistent messages across channels

A Winning Combination

Combining natural language **virtual assistants** with a powerful **knowledge management** platform is a **win-win** for you and your customers.

CUSTOMERS:

- 24/7 access to smart self-help
- Consistent, accurate & personalized information
- Convenient and seamless customer experience

ORGANIZATIONS:

- Improved customer engagement
- Reduced customer support costs
- Increased sales
- Unique customer insights

The science of conversation™

Creative Virtual designated a “Cool Vendor” in Gartner’s 2015 Smart Machines report.

Vendors selected for Gartner’s “Cool Vendor” report are innovative, impactful and intriguing

Gartner, *Cool Vendors in Smart Machines, 2015*, Tom Austin, Kenneth F. Brant, Magnus Revant, Earl Perkins, Brian Manusama, 10 April 2015

Disclaimer:

Gartner does not endorse any vendor, product or service depicted in our research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

Business Benefits Summary

- Improvement in Customer Satisfaction
- Contact deflection average 20-30%
- Accuracy: typically over 95%
- Average call handling times: reduced by 30%
- A Telecommunications customer is saving \$18M per year
- A software products company reduced their live customer interactions by 40%, while creating a better online experience
- A financial services customer reduced their need for live chat by over 80%
- A Telecommunications customer generated \$2M of sales within a 12 month period
- Return On Investment is typically less than 12 months

Looking to the Future

Cool Vendors in Smart Machines, 2015

Gartner predicts by 2018:

30% of our interactions with technology will be through “conversations” with smart machines.

Looking to the Future

- Mobile & Social continue to grow, becoming essential channels for customer communication
- Organisations become more widely hyper-connected
 - Internet of Things (speech)
 - Robotics
 - Virtual Agents live online and offline (kiosks and holograms)
 - Cross channel interactions/awareness
 - VCA, VPA convergence
 - Adaptive learning
